TITULACIÓN OBTENIDA

Diploma acreditativo

OBJETIVOS

In the advanced section of the course the learner is provided with extensive practice in more complex areas of business English such as negotiations, presentations, analyzing data and the business press.

The various lexical fields are presented through freer practice in simulations, telephone calls and general conversation; encouraging the student to draw from personal experience to give meaningful, contextual practice.

More complex structures such as the second conditional, narrative tenses and future forms are used to carry out tasks such as giving presentations, dealing with clients and expressing opinions.

Throughout the course the emphasis is on learner independence through exposure to the correct usage of the target language with attention to practical situations and the use of idioms and phrasal verbs.

The necessary language skills are studied in order to carry out communication in a business or professional context. Functions such as exchanging personal information, describing jobs, giving instructions, placing orders, common expressions used while traveling, etc. are studied.
